

Super Store Sales and Performance Analysis using SQL

NAME: K HARIBABU

INSTITUTE: BESANT TECHNOLOGY

DATE: 06/03/2026

GUIDE: Mr. KaviBharathi

1. Write a query to display distinct state.

Select distinct state

from store;

	state
▶	Kentucky
	California
	Florida
	North Carolina
	Washington

2. Write a query to display segment, country, total sales and number of orders for each country in every segment.

Select segment, country, sum(sales),
count(*) from store
group by segment, country;

	segment	country	sum(sales)	count(*)
►	Consumer	United States	1161401.3449999888	5191
	Corporate	United States	706146.3668000001	3020
	Home Office	United States	429653.1485000003	1783

3. Write a query to display region, total sales of store and max sales with help of limit is 5 and offset is 2.

Select region, sum(sales)

from store

group by region

order by sum(sales) desc

limit 5 offset 2;

	region	sum(sales)
▶	Central	501239.8908000005
	South	391721.9050000003

4. Write a query to display category, total quantity of store and find the bottom 3 quantities.

```
select category, sum(quantity)
```

```
from store
```

```
group by category
```

```
order by sum(quantity) asc limit 3;
```

	category	sum(quantity)
►	Technology	6939
	Furniture	8028
	Office Supplies	22906

5. Write a query to display state with profit margin above 10%.

```
select state,(sum(profit)/sum(sales))*100  
margin
```

```
from store
```

```
group by state
```

```
having (sum(profit)/sum(sales))*100>30;
```

	state	margin
►	Kentucky	30.607163090040824
	Minnesota	36.242618076123925
	Michigan	32.07461834014262
	Delaware	36.34603373733826
	Indiana	34.32511012903284
	Georgia	33.09861548351144
	Rhode Island	32.19746980239842
	Arkansas	34.326446956832996
	Montana	32.800376501605214
	District of Columbia	36.98366154512011
	Maine	35.77138674411465
	South Dakota	30.012184925050928

6. Write a query to display state with region of store and state starts with 'K' and region does not ends with 'A'.

select state, region

from store

where state like 'k%' and

region not like '%a';

state	region
Kentucky	South
Kansas	Central
Kansas	Central
Kansas	Central
Kentucky	South
Kansas	Central
Kansas	Central
Kansas	Central
Kansas	Central
Kentucky	South
Kentucky	South
Kentucky	South
Kansas	Central
Kansas	Central

7. Write a query to display city with region of store and the profit between 500 to 2000 and sales not between 50 to 100.

select city, region

from store

where profit between 500 and 2000 and
sales not between 50 and 100;

city	region
Franklin	Central
Lakeville	Central
San Diego	West
New York City	East
New York City	East
Des Moines	West
Great Falls	West
Santa Ana	West
Jackson	Central
Detroit	Central
Virginia Beach	South
New York City	East
Washington	East
New York City	East

8. Write a query to display details of store and discount is 0 and present in profit.

select * from store

where discount=0 and profit is not null;

	City	State	Postalcode	Region	Category	Subcategory	Sales	Quantity	Discount	Profit
▶	Henderson	Kentucky	42420	South	Furniture	Bookcases	261.96	2	0	41.9136
	Henderson	Kentucky	42420	South	Furniture	Chairs	731.94	3	0	219.582
	Los Angeles	California	90036	West	Office Supplies	Labels	14.62	2	0	6.8714
	Los Angeles	California	90032	West	Furniture	Furnishings	48.86	7	0	14.1694
	Los Angeles	California	90032	West	Office Supplies	Art	7.28	4	0	1.9656
	Los Angeles	California	90032	West	Office Supplies	Appliances	114.9	5	0	34.47
	Madison	Wisconsin	53711	Central	Office Supplies	Storage	665.88	6	0	13.3176
	West Jordan	Utah	84084	West	Office Supplies	Storage	55.5	2	0	9.99
	San Francisco	California	94109	West	Office Supplies	Art	8.56	2	0	2.4824
	Fremont	Nebraska	68025	Central	Office Supplies	Art	19.46	7	0	5.0596
	Fremont	Nebraska	68025	Central	Office Supplies	Appliances	60.34	7	0	15.6884
	Orem	Utah	84057	West	Furniture	Tables	1044.63	3	0	240.2649
	Los Angeles	California	90049	West	Technology	Accessories	90.57	3	0	11.7741

9. Write a query to display number of orders with maximum sales of store and profit between 1000 to 2000 in each state.

```
select count(*),max(sales)
```

```
from store
```

```
where profit between 1000 and 2000
```

```
group by state;
```

	count(*)	max(sales)
►	11	5199.96
	1	2999.95
	1	2715.93
	1	3040
	2	3266.376
	2	2999.95
	3	5083.96
	1	3080
	1	8399.976
	1	2541.98
	1	3812.97
	1	4535.976
	1	4404.9

10. Write a query to display average profit with minimum sales of store and region starts with 'S' and category does not start with 'f'.

```
select avg(profit),min(sales)
```

```
from store
```

```
where region like 'S%' and
```

```
category not like 'f%';
```

	avg(profit)	min(sales)
▶	31.038993944099364	31.038993944099364

**11. Write a query to display number of orders in store and sales more than 100
And they have at least 4 orders in each profit.**

```
select count(*)  
from store  
where sales>100  
group by profit  
having count(*)>=4;
```

	count(*)
▶	4
	5
	4
	6
	48
	6
	4
	4
	5
	4
	4
	6
	4
	5

12. Write a query to display profit, region with segment of store and arranging profit in descending order.

```
select profit, region, segment  
from store  
order by profit desc;
```

	profit	region	segment
►	8399.976	Central	Corporate
	6719.9808	West	Consumer
	5039.9856	East	Consumer
	4946.37	Central	Consumer
	4630.4755	Central	Consumer
	3919.9888	East	Home Office
	3177.475	South	Consumer
	2799.984	South	Consumer
	2591.9568	East	Home Office
	2504.2216	Central	Consumer

	2365.9818	East	Corporate
	2302.9671	Central	Corporate
	2239.9872	East	Consumer

13. Write a query to display sales with profit of store and sales is more than profit is 500.

```
select sales,profit
```

```
from store
```

```
where sales>(select sales from store where  
profit=500);
```

	sales	profit
--	-------	--------

14. Write a query to display ename of category is 'furniture'.

select ename

from emp

where region in(select region from store
where category='furniture');

	ename
▶	HIMAAKAR
	HARIBABU
	DILLIBABU
	ANILKUMAR

15. Write a query to display length of shipmode, concat of segment,city ,upper of country,lower of state with reverse of region of store.

Select length(shipmode),
concat(segment,city),upper(country),
lower(STATE),reverse(region)
from store;

	length(shipmode)	concat(segment,city)	upper(country)	lower(STATE)	reverse(region)
►	12	ConsumerHenderson	UNITED STATES	kentucky	htuoS
	12	ConsumerHenderson	UNITED STATES	kentucky	htuoS
